### Skills

**HTML and CSS** (*Semantic HTML and SCSS*)

**JavaScript** (*DOM, Stimulus and AJAX*)

**Ruby** (*Ruby On Rails*)

**SQL** (*PostgreSQL*)

### Professional Experience

**Bartender / Server**, *De Hooghe Heren*

10/2021 – 07/2022 | Hoogwoud, Netherlands

Required attention to detail, ability to multitask, and work under pressure. Communication with the staff was important to ensure efficiency when it was really busy.

**New Accounts Associate**, *Latah Federal Credit Union*

01/2020 – 06/2021 | Moscow, United States

Helped customers in the opening, managing, and optimizing of their financial accounts. Provide advisory services for clients. Resolving issues regarding financial accounts.

**Assistant Manager / Server**, *Mandarin Pine*

2016 – 2019 | Lewiston, United States

Helped manage a small restaurant was in charge of new staff and was responsible for opening and closing the bar as well as the restaurant.

### Profile

I am an enthusiastic and creative junior full-stack web developer that has recently accomplished a coding Bootcamp at Le Wagon. I am ready to kickstart my career in tech and turn my passion for technology into a profession where I can improve and challenge myself. My goal is to deliver solution-oriented approaches and deliver client-centered results. Besides that, I am originally from the US and am now based in the Netherlands. I am looking forward to meeting your team full of like-minded people that make projects successful.

### Education

**Full Stack Web Development**, *Le Wagon*

07/2022 – 09/2022 | Amsterdam, Netherlands

Intensive 10-week Bootcamp where we worked on projects and challenges each day. We covered OOP, relational databases, front-end development, and project workflow building a UI with Figma and collaborating as a team on Github.

**Computer Science**, *Lewis-Clark College*

2015 – 2017 | United States

Covered introductory topics in software engineering and mathematics.

### Projects

**Home Mixed**, *The best bar is yours!* ☑

An application that suggests cocktails you can make based on ingredients you have at home.

Built using Ruby on Rails, HTML, CSS, JavaScript, Stimulus, and PostgreSQL.

**Vanish**, *Destination: wherever* ☑

An Airbnb clone we built using rails and instead of apartments and houses we are renting vans.

Built using Ruby on Rails, HTML, and CSS.

### Soft Skills

Communication

Team Work

Attention to Detail

Working under Pressure

### Languages

**English** (C2, 4/4+)

**Netherlands** (B1, 1+)
